It's hard to believe it's been six years since I began researching the strange and wondrous secrets of Gravity Falls, Oregon. In all my travels, never have I've observed so many curious things! Gravity Falls is indeed a geographical oddity.

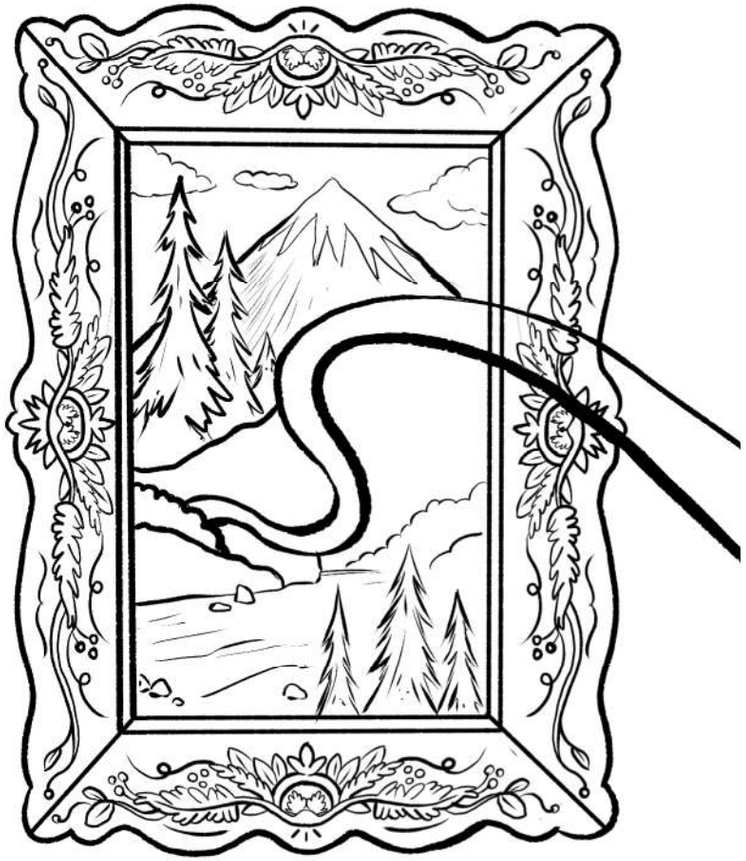
SHE'S ALWAYS WATCHING!!

There is a haunted painting located ~~in [illegible]~~ it was a picture of a woman in it that's watching everything.



Haunted paintings are strange paintings that ghosts hide within. Ghosts can freely move on in and out of any painting allowing them to jump out of people easily. Be careful around paintings in haunted houses.

Gremlablins claws are extremly dangerous due to a neurotoxin dose enduced into humans. Extreme strength and sheer mass gives the gremlablin an extra advantage in the wild. They can show all night moves upon eye contact. My study show the creatures wings

CLAWS EMIT NEUROTOXINS!

Gremlablins are very dangerous creatures so I've made these tips in case someone falls into a dangerous situation with one of these creatures: when fighting a Gremlablin use water.

Squash with Human Face and Emotions

HE'S GOURD-GEOUS!

Butternut squashes that have somehow mutated into a human's face with all kind of emotional expresions, even those that have no idea about the existance of an otside world.

Further study shows that those squashes are constantly wobowing as newer emotions appeared. While this increases my fear of a possible future where plant people have taken over.
